### Key Technologies

**16:9 Full HD 1080p Resolution Panel** 16:9 Full HD 1080p resolution panel (1920 x 1080) accepts any HDTV signal and renders it with optimum resolution.

**Motionflow™ 60Hz technology** Motionflow™ 60Hz technology helps reduce "judder" in film-based content, delivering a clearer picture during sweeping pans with reduced visible jerking or stuttering.

**BRAVIA Engine™** The proprietary BRAVIA Engine™ fully digital video processor significantly reduces noise, enhances overall image detail, and optimizes contrast, plus widens the color reproduction range for a more natural image.

**Advanced Contrast Enhancer circuit (ACE)** Advanced Contrast Enhancer circuit (ACE) dynamically improves contrast, resulting in deep blacks in darker scenes without losing fine details in shadows and other dark areas of the picture.

**24p True Cinema™ capable** 24p True Cinema™ mode enables you to enjoy films at their intended 24 fps (frames per second) when viewed using a 24p capable output device, such as a Blu-ray Disc™ player.

**DMe<sup>x</sup>™ enabled:** DMe<sup>x</sup>™ functionality expands your HDTV's capabilities by letting you connect optional BRAVIA® Link modules, including the BRAVIA Internet Video Link, BRAVIA DVD Link, BRAVIA Wireless Link, and BRAVIA Input Link (all sold separately)<sup>2</sup>.

**Xross Media Bar™ (XMB™) user interface** Xross Media Bar™ (XMB™) makes it simple and intuitive to navigate the television's menus, controls, and user settings.

**TV Guide® Interactive Program Guide** Sony has integrated the TV Guide® Interactive Program Guide into the exclusive Xross Media Bar™ user interface to deliver regularly updated program listings.

**Favorites function with rich 3D graphics** Favorites function features rich 3D graphics that make it easy and fun to quickly access video content and digital photos to share with family and friends.
